FINS Swim School Haze Advisory

Dear Parents and Students,

In view of the possibility of persistent unhealthy haze situation, we would like to reassure parents that we are consistently monitoring the air quality and taking the necessary precautionary measures to ensure a safe learning environment for our students. At FINS Swim School, the safety and well-being of our students remain our utmost priority.

Swimming Lesson Suspension Guidelines

Aligned with NEA and MOH's safety protocols, we use the 24-hour PSI as the primary benchmark, while also monitoring the 1-hour PM2.5 reading for any sudden deterioration in air quality. Our team continues to monitor these readings closely and will adjust lesson operations where the prevailing conditions require it.

- **24-hour PSI:** 201 and above
- **1-hour PSI:** 150 and above

Attendance During Haze

We understand that parents may have concerns about their children's health and safety during hazy conditions. Thus, parents and students are encouraged and advised to **exercise own discretion in deciding whether their child should attend swimming lessons during the haze**.

FINS will make the necessary adjustments to our lesson arrangements where required. For further assistance, please contact our FINS Swim School coordinator or email us at **fins@safra.sg**.

Thank you for your understanding and cooperation as we work together to ensure the safety and well-being of all our students.
